

## COLD STEEL PIPE CUTTING MACHINE

The clamshell steel pipe cutter is a pipe cutting tool for bevel, cutting and various operations.

- Split-Frame technology for endless steel pipes
- Extremely low weight of pipe cutting machine
- Quick and safe clamping and adjusting of pipe cutter
- Reduced space requirement of pipe cutting machine
- Most precise operation for pipe welding
- Pipe cold cutting operation
- High productivity
- Perfect weld preparation
- No heat affected zone (HAZ)

Video of application

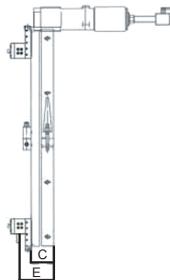

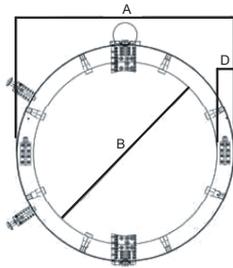

### Type DLW

#### Field of application

Portable pipe cutting machine for steel pipe machining of pipes on-site, are able to perform bevel and cutting of steel pipes as well as stainless steel pipes and high alloyed steels. The machines are reduced in weight and dimensions. The accessories allow multiple operations, like beveling and cutting in one operation, inside beveling, flange repair of flange facing. The clamshell pipe cutter is available from 3 - 48", the pipe cutters can do all kind of pipe weld preparation by use of different tools.

## OPERATIONS & OPTIONS DLW COLD CUTTER

### Field of application :

- Radial cold pipe cutting
- Beveling edges of pipes
- Simultaneous cutting & beveling
- Beveling both end in one operation
- Inside machining of pipe ends
- Flange facing

### Options drive:

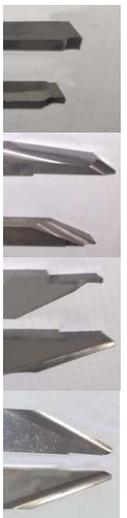

- Hydraulic Motor (recommended)
- Pneumatic Motor up to DLW 12" OD max. 1.700 W (air consumption: 2,69 m<sup>3</sup>/min)
- Pneumatic Motor up to DLW 57" OD max. 3.000 W (air consumption: 3,10 m<sup>3</sup>/min)
- Elektrical Motor (max. WT=10 mm) on request

### Materials

- Duplex
- Hastelloy
- Superduplex
- Stainless steel

### Pipe cutter overview:

- Cold pipe cutting
- Pipe bevells
- Simultaneous cutting & beveling<sup>(\*)</sup>
- Simultaneous cutting both pipe<sup>(\*)</sup>

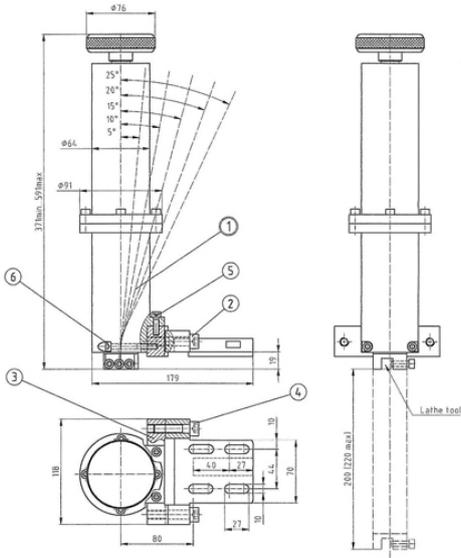

\* depending on wall thickness

# SPECIAL EQUIPMENT

## Inside counterbore

### DLW-CB:

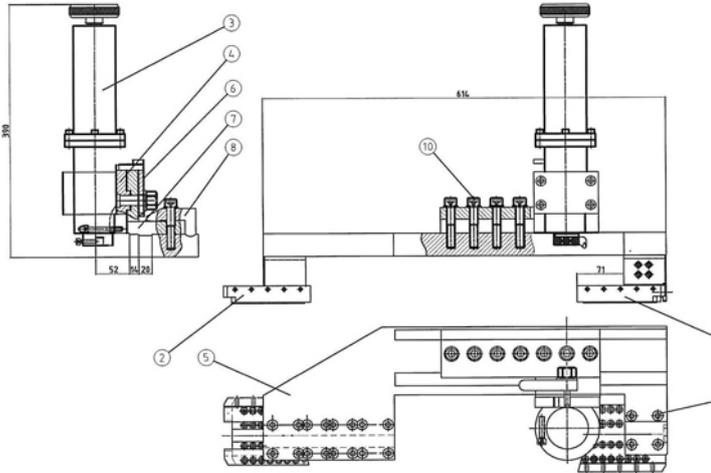

Inside beveling device for calibration of inside diameter and inside boring of max. 200 mm depth, adjustable 0° - 25°.

## Flange facing

### DLW-FF:

Flange facing device for DLW machines to regroove the flange surface, automatic feed mechanism, to be used together with DLW-CB.

## SPECIAL EQUIPMENT

### Outside turning module

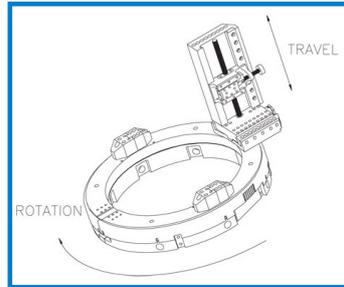

#### DLW-ETM

The outside turning module DLW-ETM can be used for external facing of heavy wall steel pipes. External isolations as well as overlapping weld seams can be removed.

**Travel:** 188mm

**Feed depth:** 25mm (50mm with two steps)

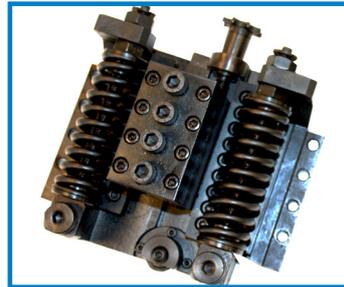

**Feeding speed:** 2mm / min

### Spring load holder

#### DLW-SLH

The spring load holder DLW-SLH is used for cold pipe cutting and beveling of out-of-round pipes. The internal springs support the feeding of cutting and beveling tools and provide an even cut for this application.
